VERBAL DESCRIPTION:

Three-chamber ocarina with 3 partial
spherical chambers preserved. The central one = 2.68 cm,
has one stop (0.42 cm) and 2 channels at right
angles (1.11 and 1.06 cm), pierced from this chamber
out. Adjoining it is one conventional chamber
with a pronounced clay lip around the channel.
The third "chamber" was not molded the
conventional way, but seems to be made from
the clay envelope pressed around a sphere -- clay
application is obvious. One small clay oval on
exterior (1.26 x 0.80 x 0.10 cm high). Exterior variably
grayed; firing core variable. No slip or paint.
Not drawn, but saved for photo.
